Philosophy of Governance

Introduction:- The management of SVKM believes in implementing fair and transparent management policies. It believes in taking all of the members into confidence before implementation of process and plans. Issues are discussed and agendas are placed during the Annual General Body meeting. It is made sure that any major decision enjoys the full unanimous support of the members without any conflict of ideologies or interests whatsoever.

Best practices and methodologies implemented in successful organizations are observed and

discussed to find out its viability in the local environment with respect to SVKM.

A significant amount of emphasis is laid on bottom up communication where a considerable amount of feedback is obtained from the lower tiers of hierarchy and policies finalized for further action.

Although the duties and functions have been defined for each level of management and for each member within a particular level, provision is still made for a certain amount of autonomy. A member can exercise this power during exceptional circumstances in the larger interest of the organization. Such decisions are often appreciated by others in the hierarchy.

Participation:- Participation by both men and women is a key cornerstone of good governance. Participation could be either direct or through middle level management members. Management ensures that the participation is informed and organized. This implies freedom of association and expression on the one hand and an organized system on the other hand.

Rule of law:- Policies are implemented in view of legal frameworks which are enforced impartially. Full protection of human rights, particularly those of minorities are taken care of.

Transparency:- Fair amount of Transparency is maintained in all the decisions taken and their enforcement are done in a manner that follows rules and regulations. Information is freely available and directly accessible to those who will be affected by such decisions and their enforcement.

Responsiveness:- All the processes and decisions reach all those are involved in the system, within a reasonable timeframe.

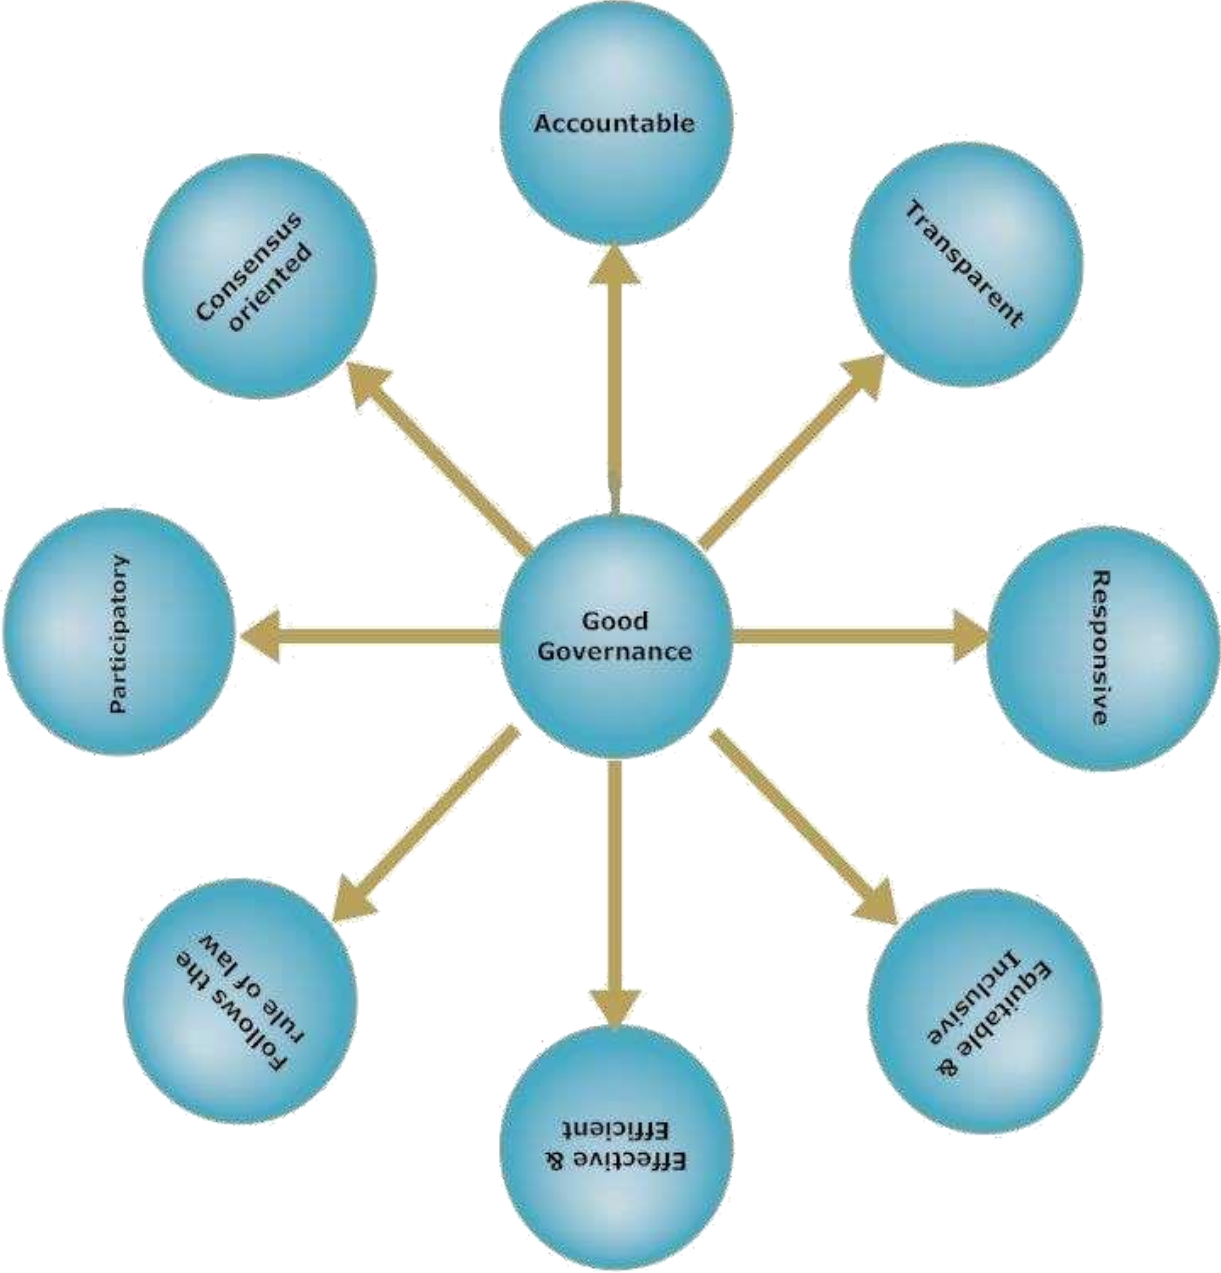

Consensus oriented:- Conflicts in ideologies and interests are sorted out through mediation to reach a broad consensus in the larger interest of the organization and community.

Equity and inclusiveness:- The management imparts a sense of security and wellbeing to all of its members, faculty and students so that they do not feel excluded from the mainstream of organization. This is achieved by providing all groups, the opportunities to improve or maintain their wellbeing.

Effectiveness and efficiency:- Management ensures that the processes and institution produce

results that meet the needs of industry and society while making the best use of resources at their disposal. This includes sustainable use of natural, human and financial resources and the protection of the environment.
